IC-A14

ENTSET

(Full keypad)

(Simple keypad)

### 700 mW\* loud audio

Because air band radios are usually operated in high-noise environments, it is essential for the radio to provide loud and clear audio. The IC-A14/S series employs a BTL amplifier that doubles the audio output, offering loud and clear audio that'll cut through cabin or tarmac noise. (\* Internal speaker only)

### Full keypad type or Simple keypad type

The IC-A14 full keypad type allows you to input the channel or frequency directly and has an exclusive button for the 121.5 MHz emergency channel. The IC-A14 receives NAV and WX channels. The IC-A14S simple keypad type provides simpler operation with a minimum of buttons that is suitable for ground crews.

# Compact, light weight and rugged body

The IC-A14/S series is compact (only 120 mm tall) and light weight (approx. 350 g including antenna and BP-232H). The water resistant construction, equivalent to IPX4, provides reliable operation in wet conditions.

# Large capacity Lithium-ion battery pack

With the 2350 mAh (typ.) large capacity Lithiumlon battery pack, BP-232H, the IC-A14/S series provides stable output power and 20 hours long (approx.) operating time\*. The BP-261, battery case takes 6 AA (LR6) alkaline cells for convenient battery backup.

\* Typical operation, Tx:Rx: Stand-by=5:5:90.

## 200 channels with memory banks

A total of 200\* memory channels can be named with an 8-character channel name for easy recognition. For fast and simple operation, these channels can be grouped into 10 memory banks\*.

\* IC-A14 only. The IC-A14S has 100 memory channels and memory banks are not available.

### **BC-160** rapid battery charger

The rapid battery charger, BC-160, quickly charges the BP-232H in 3 hours (approximately). The cigarette lighter cable, CP-23L, can be used with the BC-160.

## Other outstanding features

- 5 W typ. (PEP), 1.5 W (CW) output power
- Side tone function allows you to hear your own voice through a third party aviation headset
- LCD backlight for night time operation
- ANL (Auto Noise Limiter) for noise reduction
- · Low battery indication and beep alert
- · Adjustable microphone gain setting
- BNC type antenna connector

Note: 8.33 kHz channel spacing is NOT available for the IC-A14/S.
